

SOCIAL MEDIA

INT.	<p>GİRİŞ: There is no doubt that social media is one of the most commonly-used technological services in the world.</p> <p>GEÇİŞ: However, the question is that: Is it beneficial to use social media?</p> <p>GÖRÜŞ: In my opinion,+ using social media seems to be more preferable +in terms of + carieer, entertainment and sociality.</p>
BODY	<p>First, social media can act as an invaluable tool for professionals. They assist young professionals to market their skills and seek business opportunities. For instance, LinkedIn is a social network that brings together the people who seek jobs and who seek employers. Also social media enables you to connect significant business people or subscribe to their social accounts so you can learn from their life experiences.</p> <p>Second, social networks are becoming increasingly significant among young people. Many young people use their tablets or smart phones to check status updates from their idols, family or friends. Through this, they also keep themselves up to date. For example there are many news accounts on Twitter. By following these accounts, you can keep yourself up-to-date. Moreover, social media enables young people to become socially more capable. They express themselves more freely in social media.</p> <p>Last, social media has become a new tool to make new friends. There are many people to find news friends or reconnect with their old lost friends through social media tools. For instance, I found many of my primary school friends through Facebook and we still keep contact. Also, there are many people who find husbands or wives through social media. Besides thanks to social media, we can find friends from all over the world.</p>
CON.	<p>All in all, I strongly hold the opinion that + people should benefit from social media +because+ it allows to communicate with important people, have fun and socialize</p>

INT.	GİRİŞ: Today some people prefer to eat at home while others prefer to eat out.
	GEÇİŞ: However, the question is that: which one do you prefer?
	GÖRÜŞ: In my opinion, + eating at home seems to be more preferable + in terms of + price, health and comfort
BODY	First, eating at home is more affordable. The food you eat at restaurant may be delicious, but the money you pay for it will be quite much. When we cook at home, we make it much cheaper. For instance, eating at a nice restaurant equals to three or four days of kitchen expenses of a family of four. Besides, we can save up a lot of money when we prefer to cook and eat at home.
	Second, home food is much healthier. When you go to a fancy restaurant and order a salad, you cannot be really sure how well the vegetables are washed. But when you make your own salad at home, you are sure of what you eat because you wash and cook it by yourself. Moreover, in many restaurants, the oil they use for frying is used more than many times.
	Lastly, eating at home is more comfortable. When you go to a restaurant, you are with many people there. You feel the need to wear nice clothes when you go out. However, you can wear your most comfortable and loose-fitting clothes at home. Also, you need to mind your behavior when you eat out. Even when you order a pizza, you need to use fork and knife in some luxurious restaurants. But you can eat your pizza by your hands at home.
CONC.	To sum up, + I strongly hold the opinion that+ people should eat at home +because it is much cheaper, healthier and comfortable.
